                                                                                       PTM: PHOSPHORYLATION SEEMS TO PLAY A MAJOR ROLE IN THE FUNCTIONING OF THE LARGER NEDROFILAMENT POLYPEPTIDES (NF-M AND NF-H), THE LEVELS OF PHOSPHORYLATION BEING ALTERED DEVELOPMENTALLY AND COINCIDENT WITH A CHANGE IN THE NEUGOFILAMENT FUNCTION. SIMILARITY: BELONGS TO THE INTERMEDIATE FILAMENT FAMILY. CAUTION: REP. 2 SEQUENCE DIFFERS FROM THAT SHOWN IN POSITIONS 534 TO 716 AND IS SHORTER DUE TO FRAMESHIFTS.
SUBSERVED BY THE TWO SMALLER NF PROTEINS.

PTM: THERE ARE A NUMBER OF REPEATS OF THE TRIPEPTIDE K-S-P, NFH IS
PHOSPHORYLATED ON A NUMBER OF THE SERINES IN THIS MOTIE. IT IS
FHOGHT THAT PHOSPHORYLATION OF NFH RESULTS IN THE FORMATION OF
INTERPLAMENT CROSS BRIDGES THAT ARE IMPORTANT IN THE MAINTENANCE
OF AXONAL CALIBER.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Zinc; Repeat;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          1507 PSPMGGISPAMTPWNQGATPAYGAWSPSVGSGWTPGAAGFSPSAASDASGFSPGYSPAWS 1566
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            RNA(N).

SUBGNIT: RNA POLYMERASE II CONSISTS OF 12 DIFFERENT SUBGNITS.

SUBGRILLULAR LOCATION: NUCLEAR.

PTW: THE TANDEM 7 RESIDUES REPEATS CAN BE HIGHLY PHOSPHORYLATED.

THE PHOSPHORYLATION ACTIVATES POL2.

MISCELLANEOUS: TRRE DISTINCT ZING-CONTAINING RNA POLYMERASES ARE FOUND IN BURARYCTIC NUCLEI: POLYMERASE I FOR THE RIBOSCHAL RNA PRECURSOR, POLYMERASE II FOR THE MRNA PRECURSOR, AND POLYMERASE III FOR THE MRNA PRECURSOR, AND POLYMERASE III FOR SAND TRNA GENES.

SIMILARITY: BELONGS TO THE RNA POLYMERASE BETA' CHAIN FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                1567 PTPGSPGSPGPSSPYIPSPGGAMSPSYSPTSPA-YEPRSPGGYTPQSPSYSPTSPSY-SP 1624
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | R | RRBL; M14101; AA440071.1; JOINED. |

GENERAL INFORMATION:
APPLICANT: Granados, Robert R
APPLICANT: Wang, Ping
TITLE OF INVENTION: A No. 6187558el Invertebrate Intestinal Mucin
TITLE OF INVENTION: CDNA and Related Products and Methods
NUMBER OF SEQUENCES: 4
CORRESPONDENCE ADDRESS:
ADDRESSEE: Brown, Pinnisi & Michaels, P.C.
STREET: 118 No. 6187558th Tioga

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               A;Note: undetermined tyrosine residues in the carboxyl-terminal non-repetitive region C;Comment: This protein is length polymorphic. Individuals may have between 21 and 12 partial repeats. The repeat shown is defined by Smal nuclease sites. C;Comment: Serine and threonine residues in the tandem repeat domain are extensively C;Comment: For an alternative splice form without a tandem repeat domain, see PIR:S48
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      A; Molecule type: mRNA

THEOLOGY OF THE ALM INDICATE AND INTERCEDED AND OTHER MUCUS MEMBRANE-CONTAINING ORGANS. THOUGHT TO PROVIDE A DEPTHER MUCUS MEMBRANE-CONTAINING ORGANS. THOUGHT TO PROVIDE A DEPTHER MUCUS MEMBRANE-CONTAINING ORGANS. THOUGHT TO PROVIDE A PROTECTIVE, LUBRICATING BARRIER AGAINST PARTICLES AND INFECTIOUS CACHERY AT MUCUSAL SURRACES.

1- SUBBINIT: MULTIMERIC.
1- SUBGENTS AT MUCUSAL SECRETED.
1- TISSUE SPECIFICITY: COLON, SMALL INTESTINE, COLONIC TUMORS, BRONCHUS, CERVIX AND GALL BLADDER.
1- PINS: ALL CYSTEILE RESIDUES ARE INVOLVED IN INTRACHAIN OR INTERCHAIN DISULFIDE BONDS (BY SIMILARITY).

1- POLYMORPHISM: THE NUMBER OF REPEATS IS HIGHLY POLYMORPHIC AND VARIES AMONG DIFFERENT ALLEES.
1- SIMILARITY: THE N-TERMINAL DOMAINS SOME SIMILARITY TO THAT OF SILKWORM HEMOCYTIN.

1- SIMILARITY: CONTAINS 2 VWFC DOMAINS.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                "The human MUC2 intestinal mucin has cysteine-rich subdomains located both upstream and downstream of its central repetitive region."; J.
